KEY THEMES from Maryland Children's Cabinet

1. Racial
and Ethnic
Disparities

2. ACES and
Trauma-
Informed
Practices

3. Research-
Based
Practices

(also promising practices, best
practices, & evidence-based practices)

+ LMBs are encouraged to adopt a
COLLECTIVE IMPACT approach

Adverse Childhood Experiences

Traumatic events that can have negative, lasting effects on health and wellbeing

People with 6+ ACEs can die

20 yrs

earlier than those who have none

1/8 of the population have more than 4 ACEs

4 or more ACEs

3x the levels of lung disease and adult smoking

11x the level of intravenous drug abuse

14x the number of suicide attempts

4x as likely to have begun intercourse by age 15

4.5x more likely to develop depression

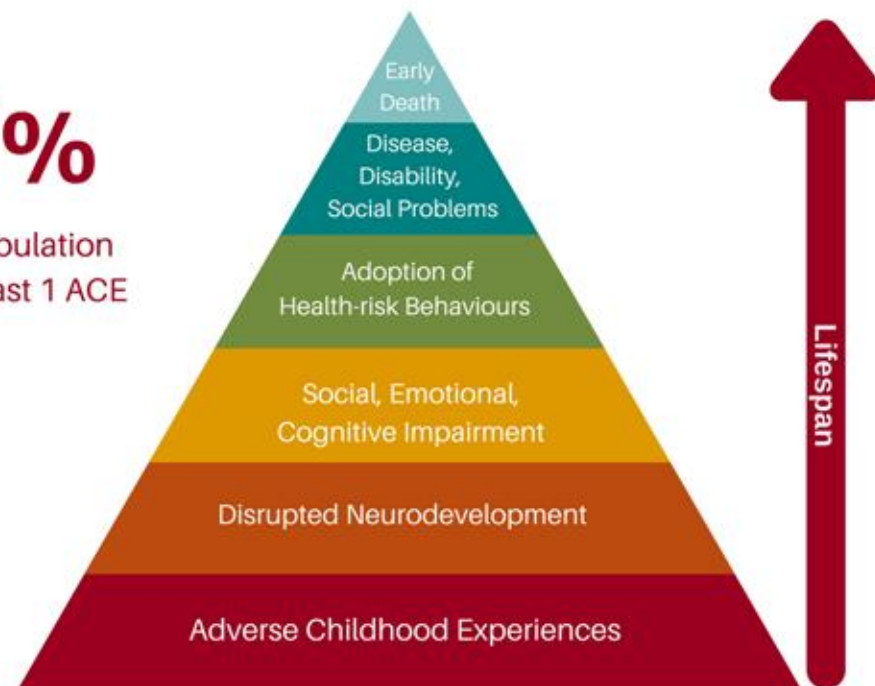

2x the level of liver disease

“ Adverse childhood experiences are the single greatest unaddressed public health threat facing our nation today ”

Dr. Robert Block, the former President of the American Academy of Pediatrics

67%
of the population have at least 1 ACE

www.70-30.org.uk
@7030Campaign

We Can Create Positive Childhood Experiences

Strengthen families' financial stability

- Paid time off
- Child tax credits
- Flexible and consistent work schedules

Promote social norms that protect against violence

- Positive parenting practices
- Prevention efforts involving men and boys

Help kids have a good start

- Early learning programs
- Affordable preschool and childcare programs

Teach healthy relationship skills

- Conflict resolution
- Negative feeling management
- Pressure from peers
- Healthy non-violent dating relationships

Connect youth with activities and caring adults

- School or community mentoring programs
- After-school activities

Intervene to lessen immediate and long-term harms

- ACEs education
- Therapy
- Family-centered treatment for substance abuse

MARYLAND • 2018 COUNTY PROFILES

Counties are the core geography for ALICE data: They reveal variations often masked by statewide averages, and the data is reported regularly and reliably.

ALICE IN TALBOT COUNTY

2018 Point-in-Time-Data

Population:	37,211	Number of Households:	16,627
Median Household Income:	\$67,204 (state average: \$83,242)		
Unemployment Rate:	3.3% (state average: 4.9%)		
ALICE Households:	25% (state average: 30%)		
Households in Poverty:	10% (state average: 9%)		

How Has the Number of ALICE Households Changed Over Time?

ALICE is an acronym for **A**sset **L**imited, **I**ncome **C**onstrained, **E**mployed – households that earn more than the Federal Poverty Level, but less than the basic cost of living for the county (the ALICE Threshold). While conditions have improved for some households, many continue to struggle, especially as wages fail to keep pace with the cost of household essentials (housing, child care, food, transportation, health care, and a basic smartphone plan).

ALICE Households by Zip Code

Communities with 30% or > ALICE Households

7

Zip Code	Total Households	% Below ALICE Threshold
ZCTA5 21601 Easton	10,447	36%

Client Census and Service Encounters

More Clients than Ever

In FY21, For All Seasons saw 2,941 clients (therapy, psychiatry, and rape crisis) – 24% more children than the year prior and 21% more clients overall.

More Services than Ever

FAS provided 43,046 services in FY21 – 27% more than the year before. The psychiatry team saw a particular uptick, providing 35% more services than the prior year.

Client Census from Talbot County

Clients from Talbot County make up one-third of our clients (consistent with FY20). In Talbot County, the we served 12% more clients than the year prior.

Financial Assistance

For All Seasons provided over \$325,000 in financial assistance in FY21 to directly support the dramatic increase in clients coming to the agency without insurance or without the ability to afford co-pays .

The image shows the cover of a report titled "PROTECTING YOUTH MENTAL HEALTH". The title is in large, bold, white capital letters. Below it, in a smaller, italicized white font, is "The U.S. Surgeon General's Advisory". The background is a dark teal color with a faint, circular seal of the U.S. Surgeon General's Office. The seal features an eagle with wings spread, perched on a shield, with the words "U.S. SURGEON GENERAL" and "1798" visible. At the bottom of the cover, there is a small white box containing the year "2021".

PROTECTING YOUTH MENTAL HEALTH

The U.S. Surgeon General's Advisory

2021

A Surgeon General's Advisory is a public statement that calls the American people's attention to an urgent public health issue and provides recommendations for how it should be addressed.

Advisories are reserved for significant public health challenges that need the nation's immediate awareness and action.

For a copy of the report, go to:

<https://www.hhs.gov/sites/default/files/surgeon-general-youth-mental-health-advisory.pdf>

FIGURE 1

GROUPS AT HIGHER RISK OF MENTAL HEALTH CHALLENGES DURING THE PANDEMIC

Note: Not a comprehensive list of groups or risk factors

Youth with intellectual and developmental disabilities (IDDs), who found it especially difficult to manage disruptions to school and services such as special education, counseling, occupational, and speech therapies^{78, 79, 80, 81, 82}

Racial and ethnic minority youth,⁸³ including:

- **American Indian and Alaska Native youth**, many of whom faced challenges staying connected with friends and attending school due to limited internet access⁸⁴
- **Black youth**, who were more likely than other youth to lose a parent or caregiver to COVID-19⁴²
- **Latino youth**, who reported high rates of loneliness and poor or decreased mental health during the pandemic^{85, 86}
- **Asian American, Native Hawaiian, and Pacific Islander youth**, who reported increased stress due to COVID-19-related hate and harassment^{87, 88}

LGBTQ+ youth, who lost access to school-based services and were sometimes confined to homes where they were not supported or accepted^{89, 90}

Low-income youth, who faced economic, educational, and social disruptions (for example, losing access to free school lunches)⁹¹

Youth in rural areas, who faced additional challenges in participating in school or accessing mental health services (for example, due to limited internet connectivity)⁹²

Youth in immigrant households, who faced language and technology barriers to accessing health care services and education⁹³

Special youth populations, including youth involved with the juvenile justice, or child welfare systems, as well as runaway youth and youth experiencing homelessness^{61, 94, 95, 96}

Additional considerations:

- **Youth with multiple risk factors.** Many young people are part of more than one at-risk group, which can put them at even higher risk of mental health challenges. For example, children with IDD who lost a parent to COVID-19, or Black children from low-income families, may require additional support to address multiple risk factors.⁹⁷
- **Discrimination in the health care system.** Some groups of youth and their families, such as people of color, immigrants, LGBTQ+ people, and people with disabilities, may be more hesitant to engage with the health care system (including mental health services) due to current and past experiences with discrimination.^{97, 98, 99}
- **Risks of COVID-19 to children with mental health conditions.** Children with mood disorders, such as depression and bipolar disorder, as well as schizophrenia spectrum disorders, are at elevated risk of severe COVID-19 illness.^{100, 101, 102}

Pages 31-32

Maryland Youth Pandemic Behavior Survey 2021 MD YPBS-21

The Maryland Department of Health conducted an online survey in the spring of 2021 that focused on how students were coping with the pandemic.

The pandemic has significantly affected Maryland high school students in many ways, including struggles with mental health, tobacco use, alcohol and drug use, trouble with schoolwork, and verbal or physical abuse at home.

- 27% used more tobacco products during the pandemic
- 37% used more illegal drugs during the pandemic
- 29% drank alcohol more often during the pandemic
 - Students from the Eastern Shore region (Caroline, Cecil, Dorchester, Kent, Queen Anne's, Somerset, Talbot, Wicomico, and Worcester) have been drinking alcohol significantly more compared to the statewide average (40%).
- Nearly 3 in 5 high school students struggled with mental health issues the past year.
- Black or African American students (53%) and LGBT students (75%) struggled significantly more with their mental health during the pandemic compared to the general population (36%).

Maltreatment continued

	FY14	FY15	FY16	FY17	FY18	FY19	FY20	FY21
Screened In: Alternative Response	23	39	39	38	65	57	52	29
Screened In: Investigative Response	98	36	35	45	45	49	45	65
TOTAL RESPONSES	121	75	74	83	110	106	97	94

Alternative Response: approach for managing low risk reports of child neglect & abuse that allows local DSS to help MD families access services and supports that will resolve their concerns. AR involves working collaboratively with families to identify concerns, locate and apply solutions that can help keep families together and provide them with the services and supports they need to keep their children safe.

Investigative Response: investigation to determine if abuse or neglect has occurred and to ensure child safety and well-being.
